A lightweight, user-friendly, jQuery based timer picker component that works perfectly with any popular CSS frameworks like Bootstrap and Tailwindcss.

Users can change the time fields by clicking up/down arrows, or by clicking the time slots and then selecting desired hours & minutes.

How to use it:

1. Load the Time Picker plugin's JavaScript and Stylesheet in your HTML page.

```
1  <script src="/path/to/cdn/jquery.slim.min.js"></script>
2  <link rel="stylesheet" href="/path/to/dist/css/timepicker.min.css" />
3  <script src="/path/to/dist/js/timepicker.min.js"></script>
```

2. Create a time input on the page.

```
1  <input type="text" class="bs-timepicker" />
```

3. Attach the timer picker to the time input and done.

```
1  $(function () {
2     $('.bs-timepicker').timepicker();
3  });
```

4. Override the default styles of the timer picker to meet your use cases.

```
01  .timepicker {
02      position:absolute;
03      z-index:1000;
04      float:left;
05      width:160px;
06      padding-bottom:5px;
07      margin:2px 0 0 0;
08      list-style:none;
09      font-size:14px;
10      text-align:center;
11      background-color:#fff;
12      border:1px solid #ccc;
13      border:1px solid rgba(0,0,0,0.15);
14      border-radius:4px;
15      -webkit-box-shadow:0 6px 12px rgba(0,0,0,0.175);
16      box-shadow:0 6px 12px rgba(0,0,0,0.175);
17      background-clip: padding-box;
18  }
```

This awesome jQuery plugin is developed by *jdewit*. For more Advanced Usages, please check the *demo page* or visit the official website.
